 - New User Roles

RAILTRAC

❖ NEW FEATURES

- Shipments | Shipment Details | CLM History | Add | Searching for a railroad during CLM add allows user to search on railroad mark instead of railroad name
- Main Menu | User can now right click on menu items to open items in a new tab.
- CLMs | Get Data | Removed unnecessary information from the Get Data Available Columns and grid.
- Shipments | Removed unnecessary columns from the default grid shipments page SYSTEM TRIP.
- Shipments | New columns added to the trip grid view: Car Status, Shipment Type, Sight Code descriptions
- **IN PROGRESS: New reports have been added but are still under development. Please expect formatting and other issues as we continue to improve these for your use.**

❖ BUG FIXES

- Shipments Page | Add Shipments | After selecting a route code, the Shipments Grid turns into a Route Code grid.
- Jeopardized Shipments | All Jeopardized Shipments | Never Shipped | When Reason is Never Shipped in All Jeopardized Shipments and from the Never Shipped window, need to fix grid display.
- Shipments Page | Add a shipment | During manual trip add, need the clock in Shipment Date field to default to 00:00:00
- CLM Date/Time | Need to display the CLM Date and Time in the CLM Date/Time field wherever it exists.
- Shipments Page | Add | Consignee search is missing a Column Chooser
- Shipments Page | Comments | Viewing a comment on a single shipment does not display the Comment Date.
- Shipments | Ellipsis menu | Hotlist Car | Error notification appears when adding a record
- Consignees & Commodities | The application is linking incorrectly to Reference Manager when navigated to from Shipment Details
- CLMs | Icons not functioning have been removed.
- Shipments and Jeopardized Shipments | When in Light Mode, the multi select viewer is dark and car numbers cannot be seen
- Shipments and Jeopardized Shipments | When cars are multi selected, the Record Creation Date and Source fields are disappearing.
- Hot List | When the Issue field in Hot List Detail is original size, the field resizer is displaying in a different color, and the Issue field is smaller than the Response field.
- CLMs | In the popup filters in the CLMs section, the Car Init field should be all caps.
- Shipments Detail | The user should be able to open or close a trip manually and save it.
- Shipments | We need to add missing values to the Freight Payment Code dropdown.
- Error Message Returned by API When RT_READONLY User Attempts to Save a Trip Is Not Displaying to User

REFERENCE MANAGER

❖ NEW FEATURES

- Main Menu | Need to add a menu item: Customer Alias
- Main Menu | User can now right click on menu items to open items in a new tab.
- Main Menu | New Main Menu item: Comments with submenu items Comment Types and Comments - Misc
- RAILTRAC Advance GPS | In Railcars, Removed unnecessary columns

❖ BUG FIXES

- Consignees | Delete a consignee does not work at all
- Commodities | Delete a commodity does not work at all.
- RAILTRAC Advance | Customer Types | Cannot Add a record
- Equipment | Outage Index | Grid is not loading
- RAILTRAC Advance | RAILTRAC.AdviZe | Recipients, Customer Recipient and Supplier Recipient grids not loading properly
- Consignees | Cannot add data to Detention profile, Shop Fact, Customer Recipient, Customer Alias, Customer Bill To sections
- Customer Types | Receiving error when attempting to edit a Customer Type.
- Consignees | Consignee Detail is not updating as different grid items are selected.
- Consignees | When attempting to delete Destination Criteria, after save, getting error message: "Not Found" and Criteria is not deleting.
- Consignees & Commodities | The application is linking incorrectly to Reference Manager when navigated from Shipment Details.
- Consignees | When adding Consignee Numbers, the Expected Hold Time should always default to 48 hours.
- Main Menu | Trans Cat needs to be moved to YardMaster Advance submenu
- Main Menu | Need to remove the RAILTRAC menu item under Reference Objects and move Hot List menu item along with submenus Category & Type under Reference Objects as a standalone menu item
- RAILTRAC Advance System Routes | Need to remove the ability to Edit, Delete, and Add System Routes
- RAILTRAC Advance Trouble Type | Need to remove the ability to Edit, Delete, and Add Trouble Types
- Country | The Country grid flashes when it is selected, but then it disappears.
- Commodities | Detail only displays for the first clicked grid item.
- Business Group Fact | The Business Group Fact grid load is delayed, prefaced by blank style grid.
- Equipment | The Lease Party Types grid is not loading.
- Total count does not display on some grids and scroll not working properly
- Railroad Facts | Partners | Exported excel file does not contain some values
- Railroad Facts | Partners | Error notification appears when sort a column
- Equipment | Car Type grid not loading.
- Consignees | All sections under Consignee Details are missing from the Consignee section

EQUIPMENT MANAGER

❖ NEW FEATURES

- Get Data | Added Lease Maintenance Type field to Get Data and Grid sections of the Equipment
- Main Menu | Anchor Main Menu items so the user can right click and open items in a new tab.
- Added a Delete icon to the Equipment grid.
- Equipment System Templates | Added new system templates to the Lease Rider Menu
- Equipment System Templates | Added additional columns to the default System Lease Rider Template
- Added dropdowns to entities in the Lease information section of Equipment.

❖ BUG FIXES

- RAILTRAC Advance | Add, Column Chooser is missing from main grids like Equipment and Lease Rider
- The expiration date logic when a user enters more than one rental rate to a rider is not functioning.
- Common Mechanical Fields | When removing all Equipment Component Categories from the display groupings, the dialogue box is hidden.
- Need to label browser tabs with navigation location within the app.
- Rail Equipment Current Dates - Screen Issue
- Rail Equipment Current Dates | The columns Lessor Lease Party Name and Lessor Lease Party Type are not populated with correct data
- Equipment Components | Wherever the word "AUXILARY" exists, need to correct the spelling to "AUXILIARY"
- Error adding an equipment date: AAR Date requires Arrival Date to be filled.
- Lease Rider | Need to be able to add a rider with a zero rental amount.
- Lease Rider | When adding a rider, need to change the name of Lessor No. field to Lease Party
- Lease Rider | When attempting to add a new Asset Status to a piece of equipment (LSS to LSS Status with a new rider), not getting valid options on the rider.

Access Control
