RAILTRAC

❖ NEW FEATURES

- Shipments Module | Multi-select | | *Add CLMs* is now available in the multi-select Ellipsis Menu to allow users to add the same CLM to multiple trips.
- CLMs | Get Data | Car ID has been added to Available Columns in Get Data inside CLMs.
- Shipments | In the detail section the CLM section is now above the Diversions section.
- Updated the Date Format on RAILTRAC Reporting Grids from *yyyy-mm-dd* to *mm-dd-yyyy*
- Shipments | When shipments initiate in Status 3, the Return City on the trip is the same as the Destination/Release City
- Shipments | Diversions| Diversion Functionality is now available in RAILTRAC ADVANCE. An instruction guide will be provided separately.

❖ BUG FIXES

- Hot Lists | Maximum character count is now visible in the dialogue box. The system will not allow users to enter or paste more than the allowable 255 characters.
- Shipments Page | Ellipsis Menu | Reapply CLMs | Reapply CLMs is now functioning from the Ellipsis Menu in the Shipment Detail header.
- CLMs | SYSTEM - ARCHIVED CLMS | The entries in the Filter Popup are now properly filtering results.
- Consignees & Commodities | The application is now linking correctly to Reference Manager when links are selected in Shipment Details.
- Routes | When creating a new Route Code, the Save Route button is now properly illuminating and allowing entries to be saved.
- Jeopardized Non-Moving | Adding/Deleting CLMs that change the status of trips is now automatically reapplying the CLMs to the trips when the CLM is added and/or when Reapply CLMs is selected.
- Jeopardized Shipments | Menu is now properly displaying all sub menu options.
