RAILTRAC®
CLASSIC RELEASE NOTES
VERSION 17.3.3

Overview

RAILTRAC® Version 17.3.3 delivers targeted enhancements and bug fixes to improve system usability, performance, and reporting accuracy. This release is optimized for 1280x1024 resolution and fully compatible with both Classic and Advance™ environments.

Resolutions

CAR LOCATION MESSAGES (CLMS)

- Fixed: Diverted trips from Empty Shop or Storage Diversion now display the latest CLM and current location correctly.

DETENTION MANAGEMENT

- Fixed: "Print / Extract Invoice" now respects Printer Setup on the Printing & Posting screen.
- Fixed: Resolved error on Printing & Posting when selecting the "Print / Extract Invoice" button.
- Fixed: Duplicate Detention Invoice Number issue resolved by correcting the System Defaults update.
- Fixed: Proofing & Editing report now calculates "Days Held" and "Days Charged" accurately, including negative spans.
- Fixed: Adjustment line items now align correctly under matching records on Printing & Posting and Invoice Review screens, including Re-Print PDF generation.
- Fixed: Days Held and Days Charged columns remain hidden on detail rows, appearing only on the final adjustment row for improved readability.

DIVERSIONS

- Fixed: Defaults box added to Multi-Diversions screen.
- Fixed: Diversions now populate correct Trip and CLM locations.
- Fixed: Shop Form auto-generation for Empty Shop Diversions re-enabled on Multi-Diversions screen.
- Fixed: Diversion Details now include Previous SPLC location.
- Fixed: Multi-Diversions now populate correct Destination and Release locations on Trip and CLM tables.
- Updated: "Empty/Storage Diversion" now displays full description on the View Diversion Detail screen.
- Fixed: Empty Multi-Diversions now inherit Fleet ID and Business Group from the original trip.

GEOGRAPHY

- Fixed: Right-click quick filter on SPLC column in the SPLC/ERPC maintenance screen restored.
