REFERENCE MGR ADVANCE

RELEASE NOTES

VERSION 1.2

Overview

Reference Manager Advance Version 1.2 delivers new enhancements for managing Commodities, HAZMAT, Customers/Consignees and Detention Profiles. We have also released features in preparation to support eBILL and YardMaster Advance. This version addresses bug fixes to improve system usability and performance.

Enhancements

CONSIGNEES

- The Ship To section in Consignees now has a search and dropdown for SPLC ERPC city lookups. Selecting a city/state auto-populates Country and SPLC codes, and those fields are read-only.
- During Consignee Add, the Delivery Road field in the Rail Details section is now a picklist
- During Consignee Update, the Consignee Type field is now read-only for consignee numbers that have existing trips. When no trips exist, the field uses a dropdown for selection.
- Detention Profile is now available.

GEOGRAPHY

- Users can now add SPLC records in Geography. The SPLC 6 field accepts input, entry is restricted to numeric characters, the City field is free-form, and ERPC City and State are required.

COMMODITIES

- A new Hazmat Facts Maintenance module has been added to Reference Manager, allowing users to centrally manage hazmat data. Hazmat information is editable in the new module and displayed as read-only in the Commodity module.
- Tariff Rate UM and Tariff Price have been relabeled as Price UM and Unit Price.
- Commodity Classification is available under RAILTRAC Advance - Commodity Class. It has been removed from Commodity Detail.

RELEASE NOTES

VERSION 1.2

Resolutions

CONSIGNEE

- Sight Code values are now displayed in the dropdown when adding a Destination Criteria record for an existing Consignee.
- Customer Dlv Hours can now be edited in Consignee Fact records.
- Special Characters like & and _ can now be used in Consignee No's
- Saving a new consignee properly saves and returns the user to the list with a confirmation message.
- Fixed an issue with field behavior in Consignee Facts.
- Open in New Tab functionality is fixed in Consignees and Commodities.

COMMODITIES

- Fixed an issue with field behavior in Consignee Facts.
- Hazmat Indicator now treats "Null" as "No".
- Open in New Tab functionality is fixed in Consignees and Commodities.
- The API Table field in Commodities is now a dropdown selection instead of a free-text field.

EQUIPMENT

- Business Group Fact grid now loads reliably.
- Saving a new Outage Index record now completes successfully without errors.

REFERENCE OBJECTS

- An Add button is now available in Hazmat Facts, allowing users to create new hazmat fact records.

RAILTRAC ADVANCE

- Reference
 - Users can now add Trip Ref Field Values.
- Customer Alias
 - Rearranged the column order of the RAILTRAC Advance - Customer Alias grid.
 - The 'Get Data' option has been removed from the Customer Alias grid, simplifying the interface.
 - Fixed an issue with incorrect filtering on Customer Number
- Customer Type
 - Users can now successfully add and edit Customer Type records in RAILTRAC Advance without errors.
